(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Mahood, US Patent No. 5,468,895.

Mahood discloses a solid amorphous stabilizing composition comprising two components. These components may be, for example, bis (2,4 di-t-butylphenyl) pentaerythritol diphosphite and 1,6-diamino hexane. Patentee is silent as to the molecular weights of these components, but it is within the skill of the ordinary practitioner to document that the molecular weights of these components is within the range of 30-1000 g/mol. The properties of molecular weight and single phase, set forth in applicant's claim 6 are inherently possessed by the stabilizer composition of Mahood. The Mahood composition is formed by melt blending followed by cooling. The components used by Mahood have the characteristics required of applicant's components as set forth at applicant's specification at page 3. See Mahood at col. 3, line 60 through col. 5, line 23 and claims 1-13.

Claims 7-24 are allowed.
